EXPERIENCE

Fyndey Solutions, Remote — Frontend Intern

AUGUST 2022 - SEPTEMBER 2022

- My primary responsibilities during the internship were to design and develop smooth and responsive web pages and components, writing unit tests and component tests, bug fixing and improving application performance.

Techrity Mentorship Cohort II — Mentee(Finalist)

AUGUST 2022 - OCTOBER 2022

- Mentee at Techrity Mentorship Program cohort II for Frontend Development Track.

GirlScript Summer of Code — Open Source Contributor

MARCH 2022 - MAY 2022

-  Take A Break : MERN
 - I worked on the alert system of the website, used SweetAlert API, and fixed some bugs on the website.
-  Chrome-Extension : HTML, CSS & JavaScript
 - I modified the HTML and CSS codes of the Quotes Extension to make an attractive and user-friendly UI.

Peatix It Pvt Ltd, Remote — Frontend Intern

FEBRUARY 2022 - APRIL 2022

- My primary responsibilities during the internship were developing features to enhance the user experience, striking a balance between functional and aesthetic design and ensuring web design is optimized for smartphones.

PROJECTS

BlogWeet— ReactJS, Firebase, CSS, JSX

- A blog website made using React JS and Firebase.

ExtraSpace — ReactJS, Firebase, CSS, JSX

- A cloud where one can create folders, upload files and links. It helps in keeping all their documents, files, and links together at one place and saves some space on their personal device.

Portfolio Website — ReactJS, CSS

- My Personal Portfolio Website.

Explore-Places — ReactJS, Firebase, Google Maps, CSS

- A web-based application where users can find places to explore or can add the places which they want others to explore.
